

Perfect Chemistry: Fielding and Phancorp

July 21, 2009 – **Ellen McGregor**, President & CEO of **Fielding Chemical Technologies Inc.** and **Isabel Alexander**, President & Founder of **Phancorp Inc.** excitedly announce that Phancorp will merge with Fielding to provide **Cradle to Cradle®** Care of Chemicals. Fielding is Canada's largest and most accredited refrigerant reclaimer and producer of recycled chemicals. Phancorp is a leading global chemical wholesaler specializing in sourcing, procurement, distribution and logistics.

"This merge is our response to a growing market demand for green, yet cost effective products and services," says McGregor. "Our combined capabilities will provide customers with a unique partner to meet their chemical needs – from sourcing virgin chemicals to providing the greenest choice to re-purpose chemical waste and everything in between," says Alexander.

Fielding and Phancorp both share deep commitment to sustainable development and world-class credentials. Phancorp's credentials include ISO 9001, verification to Responsible Distribution® and WEConnect certification, the international standard for women-owned businesses that responsibly addresses the growing corporate demand for supply chain diversification. Credentials held by Fielding include ISO 9001, ISO14001, verification to Responsible Care® and membership in the province's prestigious Ontario Environmental Leaders program.

"Our business partners will benefit from the quality services Phancorp has always provided, plus the added bench strength that comes from Fielding and its 55 years in business" says Alexander. "Together, we look forward to a sustainable future through the business of responsibly managing chemicals throughout their life cycle," says McGregor.

Phancorp will relocate from its Brampton offices to the Fielding offices in Mississauga and will operate under the Fielding name. The transaction is expected to close August 1, 2009.
